

Press Release

Volta, a Subsidiary of PT NFC Indonesia Tbk (NFCX), MCAS Group, Consistently Builds a Massive Electric Vehicle Infrastructure Through Innovations and Collaborations Throughout 2022

Jakarta, 22 December 2022 – 2022 is a year filled with collaboration for Volta. The electric motorcycle company, which is a subsidiary of PT NFC Indonesia Tbk ("IDX: NFCX") and a member of the PT M Cash Integrasi Tbk ("IDX: MCAS") group, aggressively developed innovations and collaborations on various opportunities to build a massive electric vehicle infrastructure in Indonesia.

Since its official launch in November 2021, Volta has consistently strived to maximize its role to provide a leading experience for electric motorcycle users. From developing technical specifications and infrastructure, Volta has become a pioneer for domestic electric motorcycle manufacturers that offer easy and affordable electric motorcycle ownership programs to expand access to all levels of society in Indonesia.

Volta Constantly Presents the Latest Electric Vehicle Products through Continuous Innovation

In 2022, Volta introduced various new electric motorcycle models in collaboration with Bumilangit, including 'Virgo and the Sparklings,' 'Patriot X,' and 'Mandala'. In every product launched, Volta ensured its components were mainly made domestically. Under the Domestic Component Level Test (TKDN), 47.6% of Volta bikes were domestic components. Volta will strive to increase the percentage of its domestic components to more than 50% in 2023 to support the local economy.

In addition to product innovation, Volta also launched Volta Plus+, the most affordable electric motorcycle ownership program in its class. Users can enjoy a new experience of driving with a Volta motorcycle at a price starting from IDR12,750,000* (OTR Jakarta. With Volta Plus+, users do not need to worry about running out of batteries as they can subscribe to kilometer-based batteries starting from IDR50,000 and swap batteries instantly at hundreds of Battery Replacement System (SGB) stations in Indonesia.

Committed to Building a Massive Electric Vehicle Infrastructure

All Volta electric motorcycle products are fully supported by the Battery Replacement System (SGB) infrastructure. Up to the end of 2022, Volta has developed the most extensive battery swap infrastructure in Indonesia, allowing users to replace batteries at 200 SGB stations spread across several cities, such as the Greater Jakarta area (Jabodetabek), Bandung, Cirebon, Solo, Bali, and

Medan. Volta's massive battery replacement infrastructure will help reduce the worry of running out of battery power and make it easy to recharge quickly and efficiently.

Furthermore, Volta ensures that its SGB infrastructure is developed with technological and environmental innovations in mind. This year, Volta built an off-grid SGB station powered by solar panels that use 100% clean and renewable energy. In doing so, the company continues its commitment to reducing emissions and creating a cleaner environment.

Consistently Socialize Electric Vehicles at Every Opportunity

To encourage the use of electric vehicles in Indonesia, Volta collaborated with various parties in 2022, ranging from SOEs such as PLN, Pos Indonesia, Pos Logistik, and ITDC (Indonesia Tourism Development Corporation), to multiple corporations and governments. The synergy can accelerate clean energy implementation to improve air quality in Indonesia and reduce emissions.

Volta also participated in several exhibitions, such as BUMN Start-Up Day 2022, which was attended by Joko Widodo, Indonesian President, and Erick Thohir, Minister of State-Owned Enterprises. Other exhibitions include Ready to eMove, initiated by Presidential Staff Diaz Hendropriyono, Indonesia International Motor Show (IIMS) 2022, Indonesia Electric Motor Show (IEMS) 2022, Indonesia International Smart City Expo & Forum 2022, Bali EV Festival, and the Battery-Based Electric Motor Vehicle Exhibition (KBLBB) at the G20 Summit series. The presence of Volta's modern and technology-based motorcycles at these events was received enthusiastically by the public.

Accepts the Government's Policy Regarding Electric Motorcycle Subsidies

In the spirit of collaboration, Volta positively welcomed the Government's electric motorcycle subsidy policy plan, which was conveyed by the Coordinating Minister for Maritime Affairs and Investment, Luhut Pandjaitan. The government is said to be finalizing a scheme to subsidize around IDR6.5 million per electric motorcycle purchase to encourage its sales in Indonesia. This policy will undoubtedly make electric motorcycles more affordable and will increase its usage nationwide.

Supporting this policy, Volta is ready to accommodate high-tech electric vehicles with economical prices through 72 dealers spread throughout Indonesia. Volta believes that this step will increase public interest in using electric vehicles to accelerate its efforts towards net-zero emission.

Iwan Suryaputra, Chief Executive Officer of Volta, said, "We would like to thank each party who has entrusted Volta as their choice of electric motorcycles. We are optimistic about 2023 and will always strive to make sustainable economic, social, and environmental contributions to society by introducing Volta's high-tech electric motorcycles to numerous parties and industries. Through various initiatives in the future, we target 100,000 Volta motorcycles in Indonesia in 2023. We are

confident that electric vehicles will soon crowd Indonesia's roads, and a new era of clean energy will soon arrive.”

About PT Volta Indonesia Semesta

PT Volta Indonesia Semesta creates and develops technologies to advance the country, especially in the field of environmentally friendly transportation technology. Volta also optimizes the utilization of company resources to produce high-quality products and services. Always prioritizing technological innovation, Volta presents electric vehicles with leading-edge features that are ready to provide the best driving experience that is environmentally friendly. About PT M Cash Integrasi Tbk

PT M Cash Integrasi Tbk ("MCAS") is a leading digital distribution company in Indonesia, providing lifestyle platforms developed to simplify daily life and help Indonesians transform from conventional lifestyles to digital lifestyles. MCAS uses an integrated business model to maximize value through O2O (Online to Offline), App and sustainable IoT platform with cutting-edge technology to enhance its partner's business and provide convenience for the users. MCAS distributes digital products, such as top-up, multi-billers, travel bookings, e-tickets, and other digital vouchers, through four main channels: digital kiosks, wholesale networks, cashiers, and app/chatbots. Siaran Pers

Volta, Anak Usaha PT NFC Indonesia Tbk (NFCX), MCAS Group, Konsisten Bangun Infrastruktur Kendaraan Listrik yang Masif Melalui Inovasi dan Kolaborasi Sepanjang Tahun 2022

Jakarta, 22 Desember 2022 – 2022 merupakan tahun yang dipenuhi semangat kolaborasi bagi Volta. Perusahaan motor listrik yang merupakan anak usaha PT NFC Indonesia Tbk (“IDX: NFCX”), *member* grup PT M Cash Integrasi Tbk (“IDX: MCAS”) ini, gencar mengembangkan inovasi dan lakukan kolaborasi di berbagai lini dalam upayanya membangun infrastruktur kendaraan listrik yang masif di Indonesia.

Sejak peluncuran resminya pada November 2021, Volta konsisten berupaya memaksimalkan perannya untuk memberikan pengalaman terdepan bagi pengguna dalam berkendara dengan motor listrik. Mulai dari pengembangan spesifikasi teknologi dan infrastruktur, Volta kini juga menjadi pioner produsen motor listrik dalam negeri yang menawarkan program kepemilikan motor listrik yang mudah dan murah, demi memperluas akses motor listrik kepada seluruh lapisan masyarakat di Indonesia.

Tak Henti Berinovasi, Volta Selalu Hadirkan Produk Kendaraan Listrik Terkini

Di tahun 2022, Volta memperkenalkan berbagai inovasi model motor listrik baru di antaranya adalah hasil kolaborasi bersama Bumilangit yaitu Volta edisi ‘Virgo and The Sparklings’, ‘Patriot X’, hingga model yang terbaru yaitu ‘Mandala’. Pada setiap produk yang diluncurkan, Volta berupaya untuk mengedepankan setiap komponennya dibuat dalam negeri. Sesuai dengan Uji Tingkatan Komponen dalam Negeri (TKDN), Volta telah menggunakan 47,6% komponen dalam negeri. Untuk sepenuhnya mendukung ekonomi lokal, ke depannya Volta akan berusaha untuk terus meningkatkan presentase TKDN menjadi lebih dari 50% di tahun 2023.

Selain berinovasi dalam produk, Volta juga menghadirkan Volta Plus+, yakni program kepemilikan motor listrik termurah di kelasnya. Mulai dari Rp12.750.000* (OTR Jakarta), kini masyarakat dapat menikmati pengalaman baru berkendara dengan motor listrik Volta. Dengan Volta Plus+ pengguna dapat berlangganan baterai berbasis kilometer mulai dari Rp50.000, sehingga tak perlu merasa khawatir kehabisan baterai karena bisa menukar baterai instan di ratusan titik stasiun Sistem Ganti Baterai (SGB) di Indonesia.

Berkomitmen Membangun Infrastruktur Kendaraan Listrik yang Masif

Seluruh produk motor listrik Volta telah didukung sepenuhnya oleh infrastruktur Sistem Ganti Baterai (SGB). Hingga penghujung 2022, Volta berhasil mengembangkan infrastruktur SGB terbesar di

MCASH

Indonesia, memudahkan pengguna untuk ganti baterai di 200 titik stasiun SGB yang tersebar di beberapa kota seperti Jabodetabek, Bandung, Cirebon, Solo, Bali, hingga Medan. Kehadiran infrastruktur ganti baterai yang masif tentu akan membantu mengurangi masalah kehabisan daya baterai saat berkendara dan mempermudah pengisian ulang baterai secara cepat dan efisien.

Lebih lanjut, Volta memastikan bahwa pengembangan infrastruktur SGB dibarengi dengan inovasi teknologi yang mengedepankan lingkungan. Di tahun ini, Volta membangun stasiun SGB dengan teknologi panel surya sebagai sumber energi terbarukan yang ramah lingkungan. Kehadiran panel surya tentunya memberikan dampak baik bagi lingkungan, karena memanfaatkan energi non-fosil yang bersih dan dapat diandalkan dalam jangka panjang.

Konsisten Sosialisasikan Penggunaan Kendaraan Listrik di Setiap Kesempatan

Dalam upaya untuk mendorong penggunaan kendaraan listrik di Indonesia, Volta tercatat melakukan beberapa kerja sama dengan berbagai pihak di tahun 2022, mulai dari BUMN seperti PLN, Pos Indonesia, Pos Logistik, ITDC (Indonesia Tourism Development Corporation), berbagai korporasi, hingga pemerintah. Volta berharap sinergi yang terjalin dapat mempercepat implementasi energi bersih yang bisa meningkatkan kualitas udara di Indonesia dan mengurangi emisi.

Volta turut berpartisipasi dalam beberapa pameran seperti BUMN Start Up Day 2022 yang dihadiri oleh Presiden Indonesia Joko Widodo dan Menteri BUMN Erick Thohir, Ready to eMove yang diinisiasi oleh Stafsus Presiden Diaz Hendropriyono, Indonesia International Motor Show (IIMS) 2022, Indonesia Electric Motor Show (IEMS) 2022, Indonesia International Smart City Expo & Forum 2022, Bali EV Festival, hingga Pameran Kendaraan Bermotor Listrik Berbasis Baterai (KBLBB) pada rangkaian acara KTT G20. Kehadiran berbagai produk motor listrik Volta dengan teknologi dan desain yang modern pun mendapatkan antusiasme masyarakat yang begitu luar biasa saat menyambangi *booth* Volta di setiap kesempatan.

Sambut Positif Kebijakan Pemerintah Terkait Subsidi Motor Listrik

Masih dalam semangat kolaborasi, Volta menyambut positif langkah Pemerintah terkait rencana kebijakan subsidi motor listrik. Hal ini disampaikan oleh Menteri Koordinator Bidang Kemaritiman dan Investasi Luhut Pandjaitan mengatakan pemerintah sedang menyelesaikan skema untuk mensubsidi sekitar Rp6,5 juta per pembelian sepeda motor listrik untuk mendorong penjualan kendaraan listrik di Indonesia. Kebijakan ini tentu membuat harga motor listrik lebih terjangkau dan akan meningkatkan penggunaan kendaraan listrik di Indonesia.

Mendukung kebijakan tersebut, Volta siap mengakomodir kendaraan listrik berteknologi tinggi dengan harga yang ekonomis melalui 72 *dealer* yang tersebar di seluruh Indonesia. Langkah ini diyakini

akan meningkatkan minat masyarakat dalam menggunakan kendaraan listrik sehingga bisa mengakselerasi upaya menuju target *net-zero emission*.

Iwan Suryaputra, Chief Executive Officer Volta menyampaikan “Kami mengucapkan terima kasih kepada para pihak yang telah mempercayakan pilihan produk motor listrik mereka kepada Volta. Kami memandang optimis 2023 dan akan selalu berupaya memberikan kontribusi positif bagi masyarakat dalam bidang ekonomi, sosial, dan lingkungan yang berkelanjutan dengan memperkenalkan motor listrik Volta serta teknologi terdapatnya kepada berbagai pihak maupun industri. Melalui berbagai inisiatif ke depan, kami menargetkan untuk menghadirkan 100.000 motor Volta di Indonesia pada 2023 mendatang. Kami sepenuhnya yakin bahwa kendaraan listrik akan segera mengaspal jalanan Indonesia, dan era baru energi bersih akan segera terwujud dalam waktu dekat.”

Tentang PT Volta Indonesia Semesta

PT Volta Indonesia Semesta menciptakan serta mengembangkan teknologi-teknologi untuk memajukan negeri, khususnya di bidang teknologi transportasi ramah lingkungan. Volta juga mengoptimalkan pemanfaatan sumber daya perusahaan untuk menghasilkan produk dan jasa yang bermutu tinggi. Selalu mengedepankan inovasi teknologi, Volta menghadirkan kendaraan listrik dengan fitur terdepan yang siap memberikan pengalaman berkendara terbaik yang ramah lingkungan.
